Namma Space – Round 1 submission links

Team Triple Musketeer · Techfest IIT Bombay 2026–27 · Round 1: 3D Reconstruction & Roaming

Team members: [NAME 1], [NAME 2], [NAME 3] · Institute: [INSTITUTE] · Contact: [EMAIL]

Item	Link	Notes
Live 3D walkthrough of our room (proof of concept)	[PUBLIC VIEWER LINK]	Opens in any browser; no install. Click to look around, W A S D to walk, M to measure, N for the map
Demo video (3–5 min)	[YOUTUBE / DRIVE VIDEO LINK]	Scope, capture process and the web walkthrough
Code repository	[GITHUB REPOSITORY LINK]	Setup: `docs/INSTALL.md`; sample data with tests: `samples/`
Technical abstract (PDF, 4 pages)	[DRIVE LINK – TECHNICAL_ABSTRACT.pdf]	Pipeline, own-home results, evaluation, limitations, credits
Capture SOP (PDF, 2 pages)	[DRIVE LINK – CAPTURE_SOP.pdf]	How to scan a room (Polycam route and photo route)
Submission folder	[GOOGLE DRIVE FOLDER LINK]	All files above; shared as "Anyone with the link can view"

What to look at

1. **The walkthrough link** – the photoreal view of our own room (iPhone 14, Polycam LiDAR scan, processed by our pipeline): walk around, open the map (N), measure a door or the bed (M), search a label and draw a route.
2. **The video** – the full process from scanning to the walkable model.
3. **The abstract** – how it works and how each result was measured.

All processing runs locally on the team's laptops; no paid service is used. Open-source credits and licences are listed in the abstract (§8) and in `THIRD_PARTY_NOTICES.md` in the repository.
